CHARTERED ACCOUNTANTS OF SRI LANKA

No. of Pages - 18
No of Questions - 09

SCHOOL OF ACCOUNTING AND BUSINESS
BSc. (APPLIED ACCOUNTING) GENERAL / SPECIAL DEGREE PROGRAMME

## YEAR I SEMESTER II - INTAKE VII (GROUP B) END SEMESTER EXAMINATION - OCTOBER 2017

## QMT 10230 Business Statistics

| Date | $:$ | 27th October 2017 |
| :--- | :--- | :--- |
| Time | $:$ | 5.30 p.m. -8.30 p.m. |
| Duration | $:$ | Three $(03)$ hours |

## Instructions to Candidates:

- Write the Index Number in the space provided at the top of this sheet. Do not write your name anywhere in this question paper.
- This paper consists of three parts (I, II and III).
- Part I - Answer ALL the Questions on the same sheet given.

Part II - Answer any FIVE (05) Questions.
Part III - Answer ALL Questions.

- The total marks for the paper is 100 .
- The marks for each question are shown in brackets.
- Probability Sheets are included in the paper itself.
- Use of scientific calculators is allowed.
- Answers should be written neatly and legibly.

## PART I

Answer ALL Questions

## Question No. 01

Underline the correct answer.

In a survey it was necessary to collect data on the level of job satisfaction achieved by different employees. Therefore, a questionnaire was prepared and one question included in the questionnaire was
"Level of your satisfaction on the availability of promotional prospects in your current position"

| Very High | $\square$ | High | $\square$ | Moderate | $\square$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Low | $\square$ | Very Low | $\square$ |  |  |

Answer the questions (i) and (ii) using the above information
i. Answers provided by the respondents to the above question can be considered as
a. Qualitative discrete data
b. Quantitative discrete data
c. Qualitative continuous data
d. Quantitative continuous data
e. None of the above
ii. Answers provided by the respondents to the above question can be presented graphically by using
a. Both Pie chart and Bar chart
b. Both Pictogram and Histogram
c. Both Scatter diagram and Line graph
d. Both Scatter diagram and Bar chart
e. Both Pie chart and Histogram
iii. CABREW INTERNATIONAL is a traveling agency with 152 employees. Their management assigned different activity to each employee in each month and measure their performance level based on the successful completion of such activities. To be eligible for the next increment they should maintain a mean performance level of 75 or more during the previous year. Mr. Sunil Jayaweera is one such employee who has reached a mean performance level of 72 in his first 8 assignments. What should be the minimum mean performance level, he should maintain in his last four assignments to be eligible for the increment?
a. 66
b. 73.5
c. 78
d. 81
e. 84
iv. In using mobile phones it was noted that $40 \%$ are using pre-paid services and the others use post-paid services. Having only $40 \%$ of the males using post-paid services and $35 \%$ of all the respondents are being females, find the probability that a selected respondent is using prepaid services given that he/she is a female.
a. 0.14
b. 0.21
c. 0.26
d. 0.39
e. 0.40
v. During the new-year vacation, it was noticed that $40 \%$ of the employees are going on trips and unavailable to work on weekends. However, if the management wants to request 2 employees to work on next weekend (during the new-year vacation) find the probability that they will unable to select two such employees after making requests from 10 employees.
a. 0.0017
b. 0.0123
c. 0.0463
d. 0.9532
e. 0.9983
vi. A fuel filling station has five (05) filing points of which 03 are used to fill petrol and the remaining 02 are used to fill diesel to different types of vehicles. It was noticed that on an average it will take 3 minutes to fill petrol to a vehicle while it will take 4 minutes to fill diesel to a vehicle. Number of petrol vehicles expected to enter the fuel station within an hour is estimated is 24 and the number of diesel vehicles expected to enter within an hour is 33 .

Find the probability that all petrol filling points are busy.
a. 0.1205
b. 0.3546
c. 0.6454
d. 0.7659
e. 0.8795
vii. Kandy North Bank has introduced a self-service coffee making machine to serve hot coffee to its customers. Customers can purchase a token from the counter at the cost of Rs.25/-, enter it into the coffee machine and get a 30 ml cup of coffee. But customers are complained that in most of the time the cups are spilled over. Assuming that the filling per cup is normally distributed with mean 25 ml and variance 16 ml , how large a cup to be used in order to minimize the percentage of overfilling to just $10 \%$.
a. $\quad 18.44 \mathrm{ml}$
b. $\quad 19.88 \mathrm{ml}$
c. 30.12 ml
d. 31.56 ml
e. 31.60 ml
viii. Given below is the line graph drawn for the annual data on sales of Anthurium plants by ASHWEE PLANTATIONS during 2000-2015.

What time series components can be identified by using the above graph?
a. Increasing trend and seasonal variation
b. Increasing trend and cyclical variation
c. Decreasing trend and seasonal variation
d. Increasing trend and cyclical variation
e. Cyclical variation and seasonal variation
ix. Data were collected from 16 different areas in Sudaroliya on the average disposable income of a household (X) and the average retail sales per month of selected consumable items (Y). The least square regression model fitted for the data is given by

$$
Y=563+0.3865 X
$$

What monthly disposable income would be expected to earn by a household in an area having an average retail sales of consumable items worth of Rs. 15,250 per month?
a. Rs. 37,437
b. Rs. 38,000
c. Rs. 38,894
d. Rs. 40,019
e. Rs. 40,913
x. An investment project yields different returns with different probabilities as given below.

| Cash inflow <br> (Rs. '000) | 125 | 150 | 160 | 180 |
| :--- | :---: | :---: | :---: | :---: |
| Probability | 0.4 | 0.3 | 0.2 | 0.1 |

If the expected cash inflow of above investment is Rs. 145,000 , find the standard deviation of cash inflows.
a. Rs. 15,000
b. Rs. 83,750
c. Rs. 190,000
d. Rs. 335,000
e. Rs. 480,000

## Part II

## Answer Five (05) Questions only

## Question No. 02

Introduction of free trade zones in Sudaroliya by the newly appointed government makes many female Sudarolians to select the garment industry as their final career destinations. Many skilled and unskilled labourers have joined the industry, creating a necessity to have regular workshops to improve their performance level.

Human Resource Development Institute, established in 2015 by the Sudaroliyan government to fill this performance gap, conducts regular workshops for garment sector employees. They measure the performance level of each of those employees before and after the workshops to identify the effectiveness of such workshops. Improvement in the performance level (as a percentage) of 2000 such employees is calculated and presented in the following histogram.

i. Prepare a frequency distribution table to show clearly the information presented in the above histogram.
ii. Average improvement in performance level of these employees is given as 60 percent. Calculate the standard deviation of the improvement in the performance level.

## Question No. 03

i. Explain why multi-stage sampling is preferred over simple random sampling when there is homogeneity between the groups as well as within groups.
(02 Marks)
ii. Telephone interviewer method and face to face interviewer method are very popular methods used in the data collection process. Mention two disadvantages in the telephone interviewer method compared to face to face interviewer method.
(02 Marks)
iii. Two questions appeared in a questionnaire are
a. Name
b. Your opinion about the adequacy of using internet by the employees:
........................................................................

Comment on the suitability of these two questions
(04 Marks)
(Total 08 Marks)

## Question No. 04

MINGO ELECTRICALS is producing LED bulbs for domestic use. They sell these bulbs throughout the country using 570 sales persons and it was noticed that there is a huge variation in the number of bulbs sold by each sales personnel. Therefore, average number of bulbs sold per day by each sales personnel over the month of September,2017 is recorded and a summary table is prepared and presented for discussion at the last Management Committee meeting. The summary table presented is given below.

| Average Number of Bulbs Sold per Day | Number of Sales Personnel |
| :--- | :---: |
| $0-250$ | 92 |
| $250-500$ | 126 |
| $500-750$ | 147 |
| $750-1000$ | 135 |
| $1000-1250$ | 70 |

Following decisions were taken in the Management Committee meeting,

- To give an appreciation award for those $10 \%$ of the sales personnel who record the highest average daily sales
- To advise strongly for those sales personnel who record an average sales of less than 150 bulbs per day

Accordingly
i. More than what number of bulbs per day they should sell on an average to receive the appreciation?
(04 Marks)
ii. What percentage of the sales personnel would receive the strong advise due to their poor sales performance?
(Hint : Let it be $\mathrm{k} \%$ and equate $\mathrm{k}^{\text {th }}$ percentile to 150 and hence obtain the value of k )

## Question No. 05

Three major parties: THE DEMOCRATIC PARTY, THE LIBERAL PARTY, and THE PEOPLES ALLIANCE contested for the last general election in Sudaroliya. Based on the results released, $50 \%$ of the votes polled were casted by females.

DEMOCRATIC PARTY won the election securing $40 \%$ of the votes polled while LIBERAL PARY came second securing $35 \%$ of the votes polled.

It was also noted that $70 \%$ of the votes received by THE DEMOCRATIC PARTY were casted by females. On the other hand, males were more preferred towards THE LIBERAL PARY where $56 \%$ of the males voted for THE LIBERAL PARTY.
i. Present the above information in a tree diagram or a $3 \times 2$ contingency table.
(05 Marks)
ii. Using the table or the tree diagram you construct in part (i) above find out
a. What percentage of the males voted for THE PEOPLES ALLIANCE?
(01½ Marks)
b. What percentage of females voted for THE LIBERAL PARTT?

## Question No. 06

Manufacturer of ACQVIRA washing machines guaranteed that $95 \%$ of the machines produced by them will last for more than 2 years without any breakdown.
i. Assuming that the life time of these washing machines is normally distributed with standard deviation 2.36, Find the mean life time of an ACQVIRA washing machine.
(06 Marks)
ii. Hence or otherwise determine what percentage of the ACQVIRA washing machines will last for more than 5 years.

## Question No. 07

Mr. Ramprakash is interested in entering the cut-flower industry by constructing a medium scale net house in an approximately 20 perch land either to grow Anthurium or Orchids. He estimated the income to be earned at the end of each year for the first two years (in Rs. ' 000,000 ) for each of these projects with assigned probabilities and is given in the following table.

## Anthurium Project

| Year I | Income to be earned | 1.5 | 1.8 | 2.4 |
| :--- | :--- | :--- | :--- | :--- |
|  | Probability | 0.5 | 0.3 | 0.2 |
| Year II | Income to be earned | 2.4 | 2.35 | 2.6 |
|  | Probability | 0.4 | 0.4 | 0.2 |

## Orchid Project

| Year I | Income to be earned | 1.8 | 2.1 | 2.5 |
| :--- | :--- | :--- | :--- | :--- |
|  | Probability | 0.4 | 0.3 | 0.3 |
| Year II | Income to be earned | 1.6 | 2.4 | 2.7 |
|  | Probability | 0.6 | 0.2 | 0.2 |

i. Calculate the expected value of the capital inflows for each year for the Anthurium project (03 Marks)
ii. Calculate the expect value of the capital inflows for each year for the Orchid project
iii. Assuming the discount rate is $10 \%$ per annum, obtain the net present value of the capital inflows of the two projects separately (at the end of the first year) and select the most profitable investment.
(02 Marks)
(Total 08 Marks)

## PART III

Answer ALL Questions

## Question No 08

Due to the huge traffic congestion in Sudaroliya, most of the people living in Sub-Urban areas are moving towards its capital, Chithagon. Therefore, the construction of apartments is becoming a most profitable investment in Sudaroliya. During the last few years, many new constructions have been commenced while some other apartments are completed and ready to be sold for the general public. However, the government of Sudaroliya has noticed that the price of different apartments varies according to many factors, such as, floor at which the apartment is available, the floor area, number of bed rooms, etc.

Mr. Riswi Bernard, the Pri-minister in Sudaroliya is interested in identifying the significance of these various factors on the apartment prices, requested the Housing Development Authority to conduct a survey on these apartments. Thus, they collected the data on number of aspects and given below is the data collected on the floor area (in square meters) and the selling price (in Rs. ‘ $000,000 \mathrm{~s}$ ) of 12 such apartments

| Apartment <br> No. | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Floor Area <br> $\left(\mathbf{m}^{2}\right)$ | 750 | 800 | 850 | 950 | 1200 | 850 | 900 | 1000 | 1150 | 750 | 950 | 1250 |
| Selling <br> Price <br> (Rs. '000) | 4.75 | 5.25 | 5.85 | 6.00 | 7.25 | 5.55 | 5.82 | 6.35 | 7.43 | 4.95 | 6.15 | 7.85 |

i. The scatter diagram drawn for the above data is given below.

Using the above diagram, discuss the relationship that can exist between the two variables.
ii. Calculate the mean floor area and the mean sales price of the apartments available in Chithagon, capital of Sudaroliya.
(02 Marks)
iii. Assuming the Total Floor Area as the independent variable (X) and the Sales Price as the dependent variable (Y), the following statistics are calculated.

$$
\begin{gathered}
\sum(X-\bar{X})(Y-\bar{Y})=1,812,500 \\
\sum(X-\bar{X})^{2}=320,000 \\
\sum(Y-\bar{Y})^{2}=10,539,800
\end{gathered}
$$

a. Use the above statistics to fit a simple linear regression model to explain the relationship between Total Floor Area and the Sales Price of different apartments in Chithagon.
(06 Marks)
b. Use the relationship you obtained in Part (a) above to predict the sales price of an apartment having a floor area of 1050 square meters.
c. Calculate the Pearson's correlation coefficient and comment on the result.

## Question No. 09

Given below are the quarterly unemployment figures (in thousands of persons) for the metropolitan area TIRENCIA in Sudaroliya for the period 2014-2016.

|  | $\mathrm{Q}_{1}$ | $\mathrm{Q}_{2}$ | $\mathrm{Q}_{3}$ | $\mathrm{Q}_{4}$ |
| :--- | :--- | :---: | :---: | :---: |
| 2014 | 11.7 | 10.7 | 6.6 | 8.8 |
| 2015 | 13.3 | 11.5 | 7.4 | 8.4 |
| 2016 | 14.5 | 11.1 | 8.2 | 9.2 |

i. Use the quarterly unemployment figures in TIRENCIA to obtain the moving average trend values for each quarter.
(06 Marks)
ii. Using the trend values you obtained in part (i) above and assuming the additive model calculate the seasonal indices for each quarter.
(06 Marks)
iii. Using the trend values and seasonal indices you calculated in parts (i) and (ii) above, forecast the expected unemployment number for the last quarter of 2017.
(03 Marks)

| Binomial probabilities for $\mathrm{n} \leq 30$ and for various vales of p |  |  |  |  |  |  |  |  |  |  |  |  |  |
