Conceptual Framework for Financial Reporting (C/F)

Shakthi Karunananthan
CA Sri Lanka - Technical Division
Existing Conceptual Framework for Financial Reporting
Financial Statements provide information:

- Future net cash flows
- Resources of the entity
- Claims of the entity
- Efficient and effective discharge of responsibilities by the entity’s management

Provide Return, Capital Gains, Dividends
Conceptual Framework from 2010 to 2019

- Chapter 1 – Objective of general-purpose financial reporting (Part of FASB’s Concepts Statement No. 8)
- Chapter 2 – Reporting entity (to be added)
- Chapter 3 – Qualitative characteristics of useful financial information (part of FASB’s Concepts Statement No. 8)
- Chapter 4 – Remaining text of 1989 Framework
  - Underlying assumption
  - Elements of financial statements – definition, recognition and measurement
  - Concepts of capital and capital maintenance
Hierarchy of Accounting Qualities

Primary users of accounting information

- CAPITAL PROVIDERS (Investors and Creditors) AND THEIR CHARACTERISTICS

Constraint

- COST

Pervasive criterion

- DECISION-USEFULNESS

Fundamental qualities

- RELEVANCE
- FAITHFUL REPRESENTATION

Ingredients of fundamental qualities

- Predictive value
- Confirmatory value
- Materiality

Enhancing qualities

- Comparability
- Verifiability
- Timeliness
- Neutrality
- Free from error
- Understandability
• On March 29, 2018, the IASB published its revised Conceptual Framework for Financial Reporting.

• The revised Conceptual Framework includes:
  Chapter 1 :- The Objective of Financial Reporting
  Chapter 2 :- Qualitative characteristics of useful financial information
  Chapter 3 :- Financial statements and the reporting entity
  Chapter 4 :- The elements of financial statements
  Chapter 5 :- Recognition and derecognition
  Chapter 6 :- Measurement
  Chapter 7 :- Presentation and disclosure
  Chapter 8 :- Concepts of capital and capital maintenance

• The amendments are effective for annual periods beginning on or after January 1, 2020 in Sri Lanka.
Amendments to the Conceptual Framework for Financial Reporting
Why Revised C/F

Previous Conceptual Framework
Issued in 1989 and partially revised in 2010

Priority
Filling Gaps

Revised Conceptual Framework
Issued in 2018 and will be effective in 2020

Updating
Clarifying
On March 29, 2018, the IASB published its revised Conceptual Framework for Financial Reporting.

The revised Conceptual Framework includes:
- Chapter 1: The Objective of Financial Reporting
- Chapter 2: Qualitative characteristics of useful financial information
- Chapter 3: Financial statements and the reporting entity
- Chapter 4: The elements of financial statements
- Chapter 5: Recognition and derecognition
- Chapter 6: Measurement
- Chapter 7: Presentation and disclosure
- Chapter 8: Concepts of capital and capital maintenance

The amendments are effective for annual periods beginning on or after January 1, 2020 in Sri Lanka.
Main Changes

New Changes

Measurement
- Concepts on measurement, including factors to be considered when selecting a measurement basis

Presentation and Disclosure
- Concepts on presentation and disclosure, including when to classify income and expenses in other comprehensive income

Derecognition
- Guidance on when assets and liabilities are removed from financial statements
Main Changes

Updated

- Definitions
  - Definitions of an asset and a liability
- Recognition
  - Criteria for including assets and liabilities in financial statements

Clarified

- Prudence
- Stewardship
- Measurement Uncertainty
- Substance over Form
Key changes
The Board reintroduced *stewardship* and clarified the resulting information need.

**Stewardship**

- Users of financial reports need information to help them assess management’s stewardship. The *Conceptual Framework* explicitly discusses this need as well as the need for information that helps users assess the prospects for future net cash inflows to the entity.
- Existing and potential investors, lenders and other creditors need information to help them make those assessments.
Chapter 2 – Qualitative Characteristics of Useful Financial Information

**Fundamental qualitative characteristics**

<table>
<thead>
<tr>
<th>Relevance</th>
<th>Faithful representation</th>
</tr>
</thead>
<tbody>
<tr>
<td>• information is <strong>relevant</strong> if it is capable of making a difference to the decisions made by users</td>
<td>• information must <strong>faithfully represent</strong> the substance of what it purports to represent</td>
</tr>
<tr>
<td>• financial information is capable of making a difference in decisions if it has predictive value or confirmatory value</td>
<td>• a faithful representation is, to the maximum extent possible, complete, neutral and free from error</td>
</tr>
<tr>
<td></td>
<td>• a faithful representation is affected by level of measurement uncertainty</td>
</tr>
</tbody>
</table>

**Enhancing qualitative characteristics**

- **Comparability**
  - these four qualitative characteristics enhance the usefulness of information
  - but they cannot make non-useful information useful

- **Verifiability**
- **Timeliness**
- **Understandability**

**Cost constraint**

- the benefit of providing the information needs to justify the cost of providing and using the information
Chapter 2 – Qualitative Characteristics of Useful Financial Information

Key changes
Reintroduced the concept of prudence and defined the concept of measurement uncertainty in assessing the usefulness of financial information.

Prudence
Neutrality is supported by the exercise of prudence. Prudence is the exercise of caution when making judgements under conditions of uncertainty. Prudence does not allow for overstatement or understatement of assets, liabilities, income or expenses.

Measurement uncertainty
Measurement uncertainty does not prevent information from being useful. However, in some cases the most relevant information may have such a high level of measurement uncertainty that the most useful information is information that is slightly less relevant but is subject to lower measurement uncertainty.
Predictive Value

Information has predictive value if it can be used in making decisions about the eventual outcomes of past or current events.
Chapter 3 – F/Ss and Reporting Entity

**Reporting entity**
- an entity that is required, or chooses, to prepare financial statements
- not necessarily a legal entity—could be a portion of an entity or comprise more than one entity

**Financial statements**
a particular form of financial reports that provide information about the reporting entity’s assets, liabilities, equity, income and expenses

<table>
<thead>
<tr>
<th>Consolidated financial statements</th>
<th>Unconsolidated financial statements</th>
<th>Combined financial statements</th>
</tr>
</thead>
<tbody>
<tr>
<td>provide information about assets, liabilities, equity, income and expenses of both the parent and its subsidiaries as a single reporting entity</td>
<td>provide information about assets, liabilities, equity, income and expenses of the parent only</td>
<td>provide information about assets, liabilities, equity, income and expenses of two or more entities that are not all linked by a parent-subsidiary relationship</td>
</tr>
</tbody>
</table>
Key changes
• This chapter is newly introduced (Scope and Objectives of F/S).

Boundary of a reporting entity
• Determining the appropriate boundary of a reporting entity can be difficult if, for example, the entity is not a legal entity. In such cases, the boundary is determined by considering the information needs of the users of the entity’s financial statements. Those users need information that is relevant and that faithfully represents what it purports to represent. A reporting entity does not comprise an arbitrary or incomplete collection of assets, liabilities, equity, income and expenses.
Boundary of a reporting entity

- Its Financial Statements provide relevant information to existing and potential investors, lenders and other creditors.

- Financial Statement should describe the set of economic activities within the reporting entity.
## Chapter 4 – The Elements of F/Ss

### Previous definition of an asset
A resource controlled by the entity as a result of past events and from which future economic benefits are expected to flow to the entity

### Revised definition of an asset
A present economic resource controlled by the entity as a result of past events
An economic resource is a right that has the potential to produce economic benefits

### Main changes in the definition of an asset
- separate definition of an economic resource—to clarify that an asset is the economic resource, not the ultimate inflow of economic benefits
- deletion of ‘expected flow’—it does not need to be certain, or even likely, that economic benefits will arise
- a low probability of economic benefits might affect recognition decisions and the measurement of the asset

### Previous definition of a liability
A present obligation of the entity arising from past events, the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits

### Revised definition of a liability
A present obligation of the entity to transfer an economic resource as a result of past events
An obligation is a duty or responsibility that the entity has no practical ability to avoid

### Main changes in the definition of a liability
- separate definition of an economic resource—to clarify that a liability is the obligation to transfer the economic resource, not the ultimate outflow of economic benefits
- deletion of ‘expected flow’—with the same implications as set out above for an asset
- introduction of the ‘no practical ability to avoid’ criterion to the definition of obligation
Chapter 4 – The Elements of F/Ss

**Unit of account**

The right(s) or obligation(s), or group of rights and obligations, to which recognition criteria and measurement concepts are applied

---

**Selecting the unit of account**

<table>
<thead>
<tr>
<th>Relevance</th>
<th>Faithful representation</th>
</tr>
</thead>
<tbody>
<tr>
<td>a unit of account is selected to provide relevant information about the asset or liability and any related income and expenses</td>
<td>a unit of account is selected to provide a faithful representation of the substance of the transaction or other event from which the asset, liability and any related income or expenses have arisen</td>
</tr>
</tbody>
</table>

---

**Revised definition of income**

Increases in assets, or decreases in liabilities, that result in increases in equity, other than those relating to contributions from holders of equity claims

**Revised definition of expenses**

Decreases in assets, or increases in liabilities, that result in decreases in equity, other than those relating to distributions to holders of equity claims
### Chapter 4 – The Elements of F/Ss

<table>

Questions – Asset?? Liability??

1. Saman & Co has purchased a patent for $50,000. This patent gives the Saman & Co the sole authority to use the particular process which in turn will save $5,000 per year for the next five years.

2. Ratnayake Automobile (Pvt) Limited paid Mr. Dump $10,000 to set up a car repair shop, on condition that priority treatment is given to cars from the Company’s fleet.

3. ABC Electrics provides a warranty with every eclectic equipment’s sold.
Chapter 4 – The Elements of F/Ss

Answers

Saman & Co

- Past Event – Yes
- Right to produce Economic Benefits – Yes
- Asset - ✓

Ratnayake Automobiles

- Past Event – Yes
- Right to produce Economic Benefits – No. as no control over the car repair shop and difficult to argue
- Asset - ❌

ABC Electrics

- Present Obligation – Yes
- Practical ability to avoid – No
- Liability - ✓
Chapter 5 – Recognition & Derecognition

Recognition

The process of capturing for inclusion in the statement of financial position or the statement(s) of financial performance an item that meets the definition of an asset, a liability, equity, income or expenses.

Recognition is appropriate if it results in both relevant information about assets, liabilities, equity, income and expenses and a faithful representation of those items, because the aim is to provide information that is useful to investors, lenders and other creditors.

Recognition criteria

<table>
<thead>
<tr>
<th>Relevance</th>
<th>Faithful representation</th>
</tr>
</thead>
<tbody>
<tr>
<td>• whether recognition of an item results in <strong>relevant</strong> information may be affected by, for example:</td>
<td>• whether recognition of an item results in a <strong>faithful representation</strong> may be affected by, for example:</td>
</tr>
<tr>
<td>low probability of a flow of economic benefits</td>
<td>measurement uncertainty</td>
</tr>
<tr>
<td>existence uncertainty</td>
<td>recognition inconsistency (accounting mismatch)</td>
</tr>
<tr>
<td></td>
<td>presentation and disclosure</td>
</tr>
</tbody>
</table>

Cost constraint

Cost constrains recognition decisions, just as it constrains other financial reporting decisions.
Chapter 5 – Recognition & Derecognition

Derecognition

The removal of all or part of a recognised asset or liability from an entity’s statement of financial position

Derecognition normally occurs

- For an asset
  - when the entity loses control of all or part of the recognised asset

- For a liability
  - when the entity no longer has a present obligation for all or part of the recognised liability

Derecognition aims to faithfully represent both

- any assets and liabilities retained after the transaction that led to the derecognition
- the change in the entity’s assets and liabilities as a result of that transaction
Key changes

- The previous recognition criteria were that an entity should recognise an item that met the definition of an element if it was probable that economic benefits would flow to the entity and if the item had a cost or value that could be determined reliably.

- The revised recognition criteria refer explicitly to the qualitative characteristics of useful information.
Chapter 6 - Measurement

**Historical cost measurement bases**

- historical cost provides information derived, at least in part, from the price of the transaction or other event that gave rise to the item being measured
- historical cost of assets is reduced if they become impaired and historical cost of liabilities is increased if they become onerous
- one way to apply a historical cost measurement basis to financial assets and financial liabilities is to measure them at amortised cost

**Current value measurement bases**

- current value provides information updated to reflect conditions at the measurement date
- current value measurement bases include:
  - fair value
  - value in use (for assets)
  - fulfilment value (for liabilities)
  - current cost

  - the price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date
  - reflects market participants’ current expectations about the amount, timing and uncertainty of future cash flows
  - reflects entity-specific current expectations about the amount, timing and uncertainty of future cash flows
  - reflects the current amount that would be:
    - paid to acquire an equivalent asset
    - received to take on an equivalent liability
### Chapter 6 - Measurement

#### Factors to consider in selecting a measurement basis

<table>
<thead>
<tr>
<th>Relevance</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Relevance</strong> of information provided by a measurement basis is affected by:</td>
<td></td>
</tr>
<tr>
<td>characteristics of the asset or liability</td>
<td>contribution to future cash flows</td>
</tr>
<tr>
<td>- the variability of cash flows</td>
<td>- whether cash flows are produced directly or indirectly in combination with other economic resources</td>
</tr>
<tr>
<td>- sensitivity of the value to market factors or other risks</td>
<td>- the nature of the entity’s business activities</td>
</tr>
<tr>
<td>- for example, amortised cost cannot provide relevant information about a derivative</td>
<td>- for example, if assets are used in combination to produce goods or services, historical cost can provide relevant information about margins achieved in a period</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Faithful representation</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Whether a measurement basis can provide a <strong>faithful representation</strong> is affected by:</td>
<td></td>
</tr>
<tr>
<td>measurement inconsistency</td>
<td>measurement uncertainty</td>
</tr>
<tr>
<td>- if financial statements contain measurement inconsistencies (accounting mismatch), those financial statements may not faithfully represent some aspects of the entity’s financial position and financial performance</td>
<td>- does not necessarily prevent the use of a measurement basis that provides relevant information</td>
</tr>
<tr>
<td></td>
<td>- but if too high might make it necessary to consider selecting a different measurement basis</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Cost constraint</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost constrains the selection of a measurement basis, just as it constrains other financial reporting decisions</td>
<td></td>
</tr>
</tbody>
</table>
### Chapter 6 – Measurement Bases

<table>
<thead>
<tr>
<th>Measurement Basis</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Historical Cost</strong></td>
<td>The price paid for an asset or for the event which gave rise to the liability. This price will be constant.</td>
</tr>
<tr>
<td><strong>Current Value</strong></td>
<td>The price paid for an asset or the liability value will be updated to reflect any changes since it was acquired or incurred.</td>
</tr>
<tr>
<td><strong>Fair Value</strong></td>
<td>The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.</td>
</tr>
<tr>
<td><strong>Value in Use</strong></td>
<td>Present Value of the cash flows, or other economic benefits, that an entity expects to derive from the use of an asset and its ultimate disposal.</td>
</tr>
<tr>
<td><strong>Current Cost</strong></td>
<td>Current cost, like historical cost, is an entry value. It reflects prices in the market in which the entity would acquire asset or incur the liability.</td>
</tr>
</tbody>
</table>
Chapter 7 – Presentation & Disclosure

The statement of profit or loss

- The statement of profit or loss is the primary source of information about an entity’s financial performance for the reporting period
- Profit or loss could be a section of a single statement of financial performance or a separate statement
- The statement(s) of financial performance include(s) a total (subtotal) for profit or loss
- In principle, all income and expenses are classified and included in the statement of profit or loss

Other comprehensive income

- In exceptional circumstances, the Board may decide to exclude from the statement of profit or loss income or expenses arising from a change in current value of an asset or liability and include those income and expenses in other comprehensive income
- The Board may make such a decision when doing so would result in the statement of profit or loss providing more relevant information or a more faithful representation

Recycling

- In principle, income and expenses included in other comprehensive income in one period are recycled to the statement of profit or loss in a future period when doing so results in the statement of profit or loss providing more relevant information or a more faithful representation
- When recycling does not result in the statement of profit or loss providing more relevant information or a more faithful representation, the Board may decide income and expenses included in other comprehensive income are not to be subsequently recycled
• No changes and will be continued under the new C/F.

Capital Maintenance

How an entity defines the capital that it seeks to maintain.

**Financial capital maintenance**
- Profit is earned only if the financial amount of net assets at the end of the period exceeds the financial amount of net assets at the beginning of the period, after excluding any distributions to, and contributions from owners, during the period.
- Can be measured in nominal units or units of constant purchasing power

**Physical capital maintenance**
- Profit is earned only if the physical productive capacity of the entity at the end of the period exceeds the physical productive capacity at the beginning of the period.
- Requires current cost basis of measurement
Transition to the New C/F

- The revised concepts will guide the Board when it develops or revises Standards.
- However, changes to the Conceptual Framework will not automatically lead to changes in existing Standards.
- Changes to the Conceptual Framework will have no immediate effect on the financial statements of most reporting entities.
- Preparers of financial statements could be directly affected by the changes only if they need to use the Conceptual Framework to develop an accounting policy when no Standard applies to a particular transaction or other event or when a Standard allows a choice of accounting policy.
THANK YOU
