

The Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka), in yet another groundbreaking initiative introduced the concept of webinars to thousands of Strategic Level students for the first time in the institute's 54 year old history.

The Institute conducted a series of webinars focusing on how students can improve and enjoy greater success at CA Sri Lanka examinations which was webcasted live on the CA Sri Lanka website giving access to students both in Colombo and rural areas to take part in the sessions at the convenience of their homes.

The webinars conducted for the benefit of students following CA Sri Lanka's globally recognized Chartered Accountancy qualification, focused on three strategic level subjects; Advanced Audit & Assurance, Strategic Financial Management and Business Strategy & Knowledge Management.

Apart from focusing on key subjects of the strategic level curriculum, the webinar sessions were also an important platform to help develop the competency levels of students while also helping them improve on their technical knowledge to perform better at exams.

The initiative which was also seen as a value addition to the student population of CA Sri Lanka, was also yet another effort by the national accounting body in its continuing efforts to offer improved student support in keeping with the latest global trends.

Apart from its position as the national body of accountants, CA Sri Lanka is also one of the largest tertiary education providers in the country outside the university system with an active student base of over 41,000 students who are currently following its chartered accountancy qualification.
